ROLL. NO: 13

Lost & Found Tracker 🔍

Why Do We Need This System?

- Students often **lose items like bottles, jackets, stationery, etc**.

- **Difficult to find owners** for found items

- **Objective**: To create a **user-friendly interface** for reporting, browsing, and claiming lost items

Main Screens of the UI

1. **Home Screen** – With "Report Lost" and Lost Items
2. **Item Detail Page** – Full description, image, claim button
3. **Login Screen** – Login with student's school ID

Item View

UI Features & Design Highlights

- **Clean and minimal layout** with **school-friendly colors**

- Large buttons for **easy navigation**

- **Organized by categories** (Clothing, Electronics, Stationery)

- **Responsive design**

- Optional **image uploads** for better identification
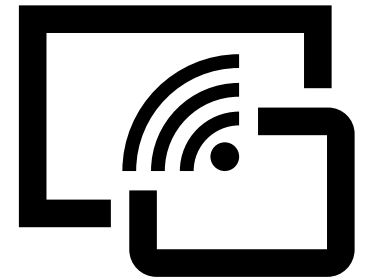

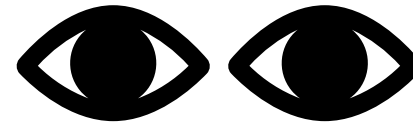

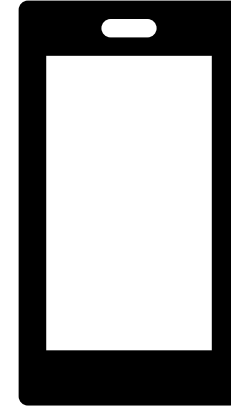

Summary & Next Steps

- The Lost & Found Tracker UI is designed to make it easier for students and staff to report, track, and claim items in a fast and organized way.

- It provides a **simple, user-friendly interface** that reduces confusion and saves time.

- This UI can be developed into a **real web or mobile app** with database support, notifications, and admin controls.

Future Possibilities:

- **Notification System** – Auto-alerts when a lost item is found
- **Mobile App Integration** – Use from anywhere on campus
- **Smart Match Suggestions** – AI-based item matching
- **Claim History & Receipts** – For tracking returned items

"A smarter way to reunite students with their belongings – one click at a time!"
